INVITATION

GOOD CLIMATE IN MY TOWN

MOBILITY AND HEALTH

Within the activities during the mobility week we invite you to join us at the promotion of environmentally friendly transportation and at the step toward higher public education about modern transport related environmental problems.

The activity will be on September 22th, 2009.

We wish to increase the knowledge how important it is to live in a healthy environment. But still more important it is to learn how to live to keep our environment clean and eco-friendly.

To do a step toward these goals we invite you to join us on the cycling from the centre of Nova Gorica, toward University of Nova Gorica, where a lecture on the influences of traffic on health and environment will be given. After the lecture we will return to Nova Gorica, where the stall of the UNG will be placed. We will cycle together with students and community members.

To avoid organizational problems we ask all interested people to register. Entry forms will be on the message boards at UNG. You can also write to the e-mail: marina.artico@ung.si.

More precise time table:

- 2:30 pm: Start of cycling from the centre of Nova Gorica (Bevkov trg)
- 3:30 pm: Lecture at the UNG: Traffic, Environment and Health (M. Vudrag, M. Franko).
- 4:30 pm: Return to Nova Gorica.

Contact person: Jana Laganis; e-mail: jana.laganis@ung.si.

Vice-president for education
Prof.dr. Mladen Franko
